Allowable Subject Matter

1. The following is an examiner's statement of reasons for allowance: The subject matter of the independent claim could not be found and was not suggested by the prior art of record. The subject matter not found is a system for performing fluid administration comprising a single unidirectional liquid pump which operates two distinct distribution lines, the first including a supply means, distribution system, pump, distribution system, and patient conduit; the second including patient conduit, liquid distribution, pump, liquid distribution, and drain collector, in combination with the features of the invention substantially as claimed.
2. The closest prior art of record is Goldrath (US 5437629) which was previously cited. Goldrath teaches a liquid distribution system operated by a single unidirectional pump, where in the flow path is chosen by the opening and closing of valves. Goldrath further discloses the second fluid distribution line including the patient conduit, pump and drain. Goldrath fails to teach the first distribution line. The device of Goldrath is used to reticulate fluid, and therefore the pump is not in the line from the fluid supply to the patient.
3. Other devices well known in the art include a bidirectional pump to deliver fluid to and from the patient.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
